Your home.
A closer view.

Light, modern and minimal. A visual room study for your family in Jammu, based on BANSI VERMA_010920.pdf.

How to review this book

Start with the feeling of each room. Check the palette, furniture and lighting, then read the decisions below the image. The live website includes extra views, 360° rooms, the complete 3D plan and review notes.

Renders show proposed finishes, products and decorative details. Wall footprints come from your PDF; 3.0 m ceilings, window heights and 2.2 m doorway heads are assumptions. No door swing is final. Actual products, samples, measured shell dimensions and coordinated services are required before purchase or construction. The two cot positions remain on hold. The staircase needs a section before a finished design can be shown.

Kitchen

8′ × 7′ · printed PDF label · proposed interior

A compact L-shaped kitchen, made for one cook. Warm oak fronts, a light worktop and a clear place for preparation make the everyday feel considered.

The design

- The 8′ × 7′ footprint stays as drawn; no island added.
- Pale oak bases, ivory upper cabinets and a light mineral worktop. The upper run stops before the window.
- Sink on the front run; fixed three-burner gas and separate fixed one-zone induction on the right; fridge near the entry.

J01 Pale oak · S01 Light mineral surface · P01 Warm ivory · M01 Brushed metal

Before we finalise

Your choice is confirmed: three gas burners plus one induction zone, both fixed. Choose actual models before cutting the counter. The 190 mm proposed gap, extractor coverage, gas access and induction ventilation require product checks.

Family bedroom

12′ × 11′ · printed PDF label · proposed interior

An oatmeal headboard, softly layered linen and a little sage. The pale oak bed gives this room warmth without filling it with heavy furniture.

The design

- 12′ × 11′ PDF room label; your confirmed 6-foot-wide bed; proposed 1900 × 2100 mm frame envelope.
- Warm reading light and linen side curtains at the rear window.
- The dressing and bathroom route remains in its original position.

P01 Warm ivory · J01 Pale oak · T01 Oatmeal textile · T02 Muted sage

Before we finalise

Your 6-foot bed choice is confirmed; the exact frame and two cot positions are still open. The larger frame leaves only about 1052 mm along the lower room edge, so circulation needs resolution. The cots are deliberately absent from these views until a measured safe fit is agreed. AC is in your brief; its final type and position are not yet selected.

Bathroom

5′6″ × 11′1½″ · printed PDF label · proposed interior

Soft stone wraps the narrow room. A wall-mounted vanity and a restrained glass screen keep the design light, with a dry arrival area and a shower at the far end.

The design

- 5′6″ × 11′1½″ PDF label; the narrow proportions are retained.
- Vanity on the right near the entry; WC on the left.
- A proposed fixed shower screen and far-end wet zone.

S01 Light mineral surface · F02 Wet-area stone · J01 Pale oak · M01 Brushed metal

Before we finalise

Electric geyser confirmed; its capacity, product and position are pending, so it is not shown as a fixed installation. Choose actual fixtures, wet-slip-tested flooring and suitable fittings. The installer must coordinate drain falls, screen access, exhaust and waterproofing. Bathroom access remains through dressing.

Drawing room

10′9″ × 11′ · printed PDF label · proposed interior

Oatmeal upholstery, light oak and a pair of sage chairs. Soft textures and a small table make the room welcoming without turning every surface into a display.

The design

- Your drawing-room footprint and front window are retained.
- A compact sofa and two occasional chairs share a low coffee table.
- A simple artwork, woven rug and linen shade complete the proposed atmosphere.

P01 Warm ivory · J01 Pale oak · T01 Oatmeal textile · T02 Muted sage

Before we finalise

Confirm sofa and chair products, fabric cleanability and rug edges. Decorative artwork and accessories are placeholders; samples and final purchases remain open.

Living & dining

18′9″ × 15′ · printed PDF label · proposed interior

Living and dining share one connected interior. A neutral sofa settles against the side wall, while an oak dining table gives the family a place to gather.

The design

- One connected living/dining footprint follows the PDF wall faces.
- Six dining places and a compact stair-side TV console.
- A warm pendant defines the dining area; the living furniture stays low.

P01 Warm ivory · J01 Pale oak · T01 Oatmeal textile · F01 Soft stone

Before we finalise

The printed lobby width differs slightly from the drawing. Confirm the shell measurement, TV viewing distance, pendant height and fan clearance before ordering.

Parents' bedroom

12′ × 11′ · printed PDF label · proposed interior

A light, uncluttered bedroom with warm bedside light, a low oak bed and simple storage. Familiar materials make it feel part of the same home.

The design

- The second 12′ × 11′ bedroom keeps its original openings.
- Two bedside tables and a shallow chest use the agreed furniture footprint.
- Soft linen and reachable bedside lighting are proposed.

P01 Warm ivory J01 Pale oak T01 Oatmeal textile F01 Soft stone

Before we finalise

Confirm the bed and mattress height with your parents, switch reach and storage needs. Final bedroom AC positioning and capacity require coordination.

Dressing

5′6″ × 7′ · printed PDF label · proposed interior

One full-height storage run and a simple mirror. Keeping storage together leaves the route between the bedroom and bathroom easy to read.

The design

- The 5′6″ × 7′ PDF space remains unchanged.
- A 1600 mm wardrobe reservation stays along the rear wall.
- No extra cabinet is placed across the bathroom route.

J01 Pale oak P01 Warm ivory M01 Brushed metal

Before we finalise

Sliding-door hardware, drawer and hanging allocation, wardrobe ventilation and mirror heights need your final choices.

Study

6′7½″ × 6′9″ · printed PDF label · proposed interior

A pale oak desk, a shallow shelf and a quiet ivory background. The room stays compact, useful and calm.

The design

- The PDF footprint is retained; the rear opening remains a high ventilator.
- A 1200 mm desk, task chair and shallow shelf are reserved.
- Task lighting is kept close to the work surface.

P01 Warm ivory J01 Pale oak T01 Oatmeal textile

Before we finalise

The printed depth and drawn wall faces differ by about 50 mm. Confirm the shell and desk power/data requirements before fabrication.

Puja

4′ × 5′ · printed PDF label · proposed interior

A light stone altar, simple symmetry and a warm wash of light. The small room remains intentionally restrained.

The design

- Your 4′ × 5′ puja room stays in the PDF position.
- A compact altar follows the reserved footprint.
- The central object is only a size placeholder for your own sacred objects.

S01 Light mineral surface P01 Warm ivory M01 Brushed metal

Before we finalise

Confirm seated or standing use, the objects you wish to place here and safe lamp arrangements. The render does not specify religious objects or rituals.

Store

7′6″ × 8′ · printed PDF label · proposed interior

Pale shelves and labelled storage boxes give everyday things a home. The doorway stays clear and the shelving follows the smaller drawn footprint.

The design

- Side and rear shelving use the drawn PDF wall faces.
- The entry is kept free of joinery.
- Modular shelf levels and storage boxes are proposals.

J01 Pale oak P01 Warm ivory T01 Oatmeal textile

Before we finalise

The PDF says 8 feet deep, but its scaled drawing is approximately 6 feet 9 inches. This must be resolved before any shelf order. Boxes are decorative placeholders.
